SUMMARY OF QUALIFICATIONS

Senior Software Engineer with 9+ years of experience shipping commercial games and 6+ years of production Rust, focused on compilers, language runtimes, developer tooling, and performance. Led engineering and production on two games that each sold 1M+ copies, directing teams of up to 15.

CURRENT PROJECT WORK

mimas – embeddable scripting language for Rust (mim.as) • 05/2023 – Present

Statically typed scripting language with Rust-like syntax, embeddable in any Rust program.

- Built the compiler, type checker, and register-based bytecode VM; compiles ~400,000 lines per second.
- VM runs 10–50x faster than Rhai, the leading Rust scripting language.
- Backed by 2,000+ tests and cargo-mutants mutation testing.

WORK EXPERIENCE

NPC Studio • 03/2020 – Present

Lead Producer, Programmer • Full-time

Fields of Mistria: farming/life sim, 1M+ copies sold, 97% positive on Steam, 1.0 released Aug 2026.

- Joined part-time; promoted to Lead Producer while remaining one of the studio's two engineers (~80% engineering, 20% production).
- Co-led the migration from GameMaker to a custom Rust engine with a GML scripting layer, cutting the crash rate by 90%.
- Wrote a test suite that runs on each pull request: every menu, quest, and cutscene in all 8 languages, plus save compatibility back to the first public release, in under 15 minutes across 30 concurrent CI jobs.
- Full-cycle leadership directing a 15 person team across 6 time zones through Early Access, 4 major updates, and the 1.0 launch.
- Designed and built mist, a Rust-implemented scripting language the writing team uses to author 14 hours of cutscenes.
- Built and maintained the art, audio, and localization pipelines used by the full team, plus Sentry crash reporting.

HopFrog S.A. • 12/2018 – 08/2020

Lead Programmer & Producer • Full-time

Forager: GameMaker crafting/exploration game (2019), 1M+ copies across PC, console, and mobile.

- Brought in to fix launch-blocking performance issues; rewrote the 50,000-line codebase, cutting Nintendo Switch frame time from 33 ms to ~4 ms.
- Led programming and production for launch and 3 post-launch updates; hired and managed a team of 6.

Nikko Nikko • 01/2020 – 07/2020

Producer, Programmer • Contractor

INFINITE GUITARS: rhythm RPG published by Humble Games; released March 2023 on PC, Xbox One/Series X|S, and Nintendo Switch, and included in Xbox Game Pass.

- Produced and programmed the Unity vertical slice that secured its publishing deal.

Freelance | Self-Employed • 08/2017 – 12/2018

Freelance Consulting

- Delivered engineering contracts for individuals and studios: games in GameMaker Studio 2, tooling in Python, TypeScript, and Electron.

SKILLS

Languages: Rust, Python, TypeScript, C#, C++

Domains: compilers, bytecode VMs, language servers, performance optimization, test infrastructure, CI/CD
